

RAISING THE BAR
ON PATIENT SAFETY

BARCODE TECHNOLOGY

We have implemented barcoding in our patient care and research work to provide you with a safer experience.

This system allows your care team to link you to your medical orders and thereby accurately obtain clinical and research specimens and safely provide blood transfusions and give medications.

Get Your Code

We need your help to assure that every patient has a unique barcode. Your inpatient wristband is printed with your barcode upon admission. If you are an outpatient, your barcode should be placed on your extended visitor badge. If you do not have an extended visitor badge, you will need to get a barcode card.

At your convenience please visit our barcode station on the P1 level (just outside the South Elevators).

Inpatients

If you are a current inpatient, you are wearing a wristband with your unique barcode. Please keep your wristband on at all times.

Outpatients

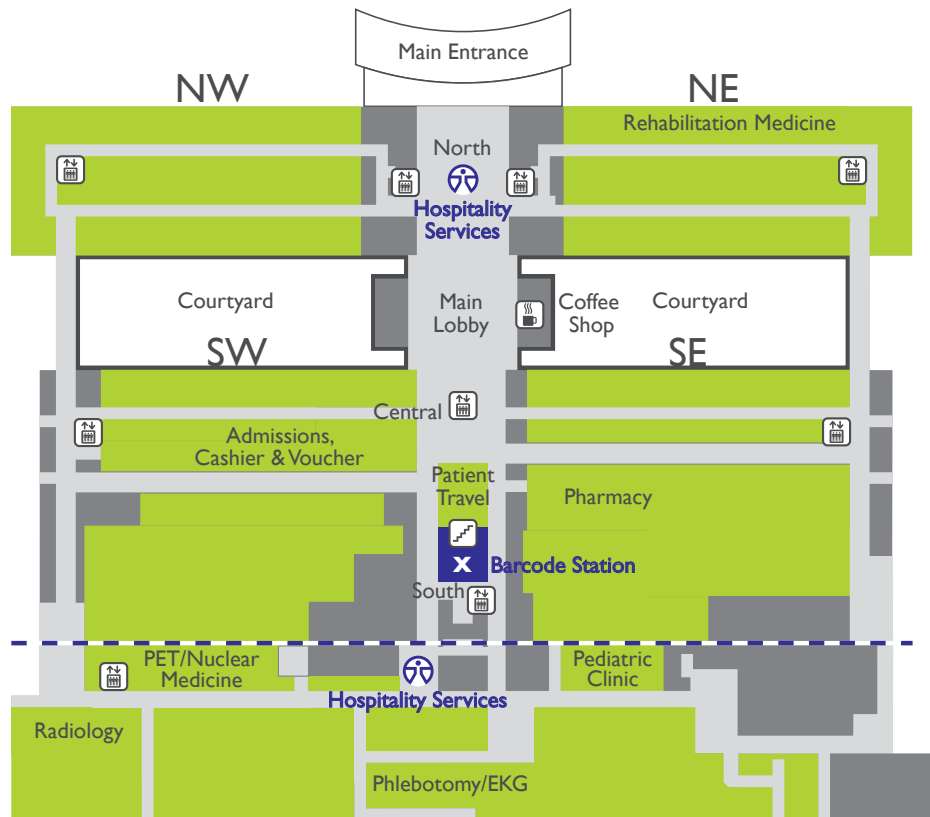

Extended Visitor Badges

If you are an outpatient with an extended visitor badge, we can place your unique barcode on your current badge as a convenience to you. Please visit our barcode station.

Barcode Card

If you are a current outpatient without an extended visitor badge, you need to get a barcode card. Please visit our barcode station to be issued the card and bring it with you on all future visits to the Clinical Center.

Questions? Visit one of the Hospitality Services desks around the Clinical Center.
